Project Entry

1 Defining the Project Lifecycle and Goal of Project Management

What is a project? What does it mean to manage a project in a professional services business?

2 Initial Project Setup

How do you add projects? How do you use templates and opportunities?

3 Budget Breakdown

How do you break down fees? What are expense budgets? How do you include or exclude sub-consultants?

4 Timeline Creation

Why does timeline matter at the start of a project, particularly if your projects have frequent timeline changes?

5 Scope Definition

Where will you track scope? Who will assign tasks and hours? How often do you report progress? Who makes adjustments?

6 Advanced Template Use

Creating templates from existing projects and importing phases or tasks from a template.

Project management is balancing budget, timeline, and scope with your team's **utilization**.

A project is a scope of work you're doing for a certain budget on a certain timeline.
Your team's time is the tool you utilize to achieve those three things.

Project BTS Throughout the Project Lifecycle

Firm Setup	Project Entry	Project Planning	Project Tracking	Invoicing
Enter firm revenue and profit targets, supporting team utilization targets, and team cost information	Enter the known budget, timelines, and scope (BTS) expectations or limitations of your project	Assign team members to meet the BTS expectations of your project	Monitor how your team is working to meet project BTS expectations	Bill the client based on value of time, expenses, and completion of work

Project BTS Throughout the Project Lifecycle

Budget	Firm Setup	Project Entry	Project Planning	Project Tracking	Invoicing
	Enter firm revenue and profit targets, supporting team utilization targets, and team cost information	Enter the known budget, timelines, and scope (BTS) expectations or limitations of your project	Assign team members to meet the BTS expectations of your project	Monitor how your team is working to meet project BTS expectations	Bill the client based on value of time, expenses, and completion of work
	<ul style="list-style-type: none">• Enter default roles and rates• Enter expense types for subs and expenses• Add team members and assign default roles	<ul style="list-style-type: none">• Enter budgets for services• Enter budgets for sub-consultants and expenses• Link expense budgets to billing phases (if applicable)	<ul style="list-style-type: none">• Use Project Resource Schedule to assign hours to team members based on remaining budget• Optimize firm and individual utilization targets on People Resource Schedule	<ul style="list-style-type: none">• Team members log time and expenses• Project managers regularly update completion status for each phase• Compare budget spend to completion	Create invoices based on logged time and expenses or percent complete
